User Manual

CONTENTS

1. Introduction

Thank you for deciding to purchase a JCAII counting scale. This goods has the excellent performance and splendid properties under severe quality management .It is recommended to read this manual in full before using it for good function application.

2. Precautions

◎ Place the scale on a flat and stable surface. See 3-3 Leveling the Scale for details.

◎ Verify that the input voltage and the plug type matches the local AC power supply.

◎ Warm up the scale for 15 minutes before using it the first time.

◎ Keep the scale away from EMI noise, strong wind and vibration, which might cause incorrect reading.

◎ Avoid sudden temperature changes (suitable operating temperature is between -5℃~ 40℃.)

◎ Disconnect the power supply when cleaning the scale.

◎ Do not immerse the scale in water or other liquids.

◎ Service should be performed by authorized personnel only.

3. Before Using the Product
3-1 Unpacking and Checking

Open the package and check the instrument for transport damage. Immediately inform your dealer if you have complaints or if parts are missing. The package should contain:

- Scale body
- User manual
- Stainless steel pan
- Wire (power cord)

3-2 Installing Components

Cover the stainless steel pan on the top housing properly before using the scale.
Important:

Please find the delivery protection screw in the bottom of the scale.   Loose it according to the instruction sticker next to it

Before use the scale   Loose the screw <u>counter-clockwise</u> to the end

Before move the scale   Tighten the screw <u>clockwise</u> to the end
3-3 Leveling the Scale

To compensate for small irregularities or inclinations at the location, the scale can be leveled. The scale is equipped with a level indicator at the front panel .Adjust the adjusting feet until the air bubble in the indicator is centered as shown.

Note: The scale should be leveled each time its location is changed.
4. Product Introduction

4-1 Display

1) **Weight Window:** displays weight of object on weighing pan, or accumulated weight value.

2) **Unit Weight Window:** displays the average piece weight value, or number of weighments .

3) **Total Count Window:** displays the calculated number of pieces on the weighing pan, or accumulated piece count value.

4) ⟶T⟩ Tare or Preset Tare indication.

5) ⟶O⟶ Center of Zero Indication, The zeroing range is ±2% of weighing capacity.

6) **PRESET TARE** Symbol "▼" points at **"PRESET TARE"** when Tare value entered via numeric keys.

7) ⋰⋱ Under the sample counting mode, Symbol "▼" points at **"SMPL"** when calculated unit weight is lower than 4/5 of scale division or the quantity of sample is less than 10 pieces.

8) ⟩Σ⟨ "Accumulation" function is enabled under weighing mode.

9) Ⓦ Under entering a known unit weight mode, Symbol "▼" points at **"UW"** when entered unit weight is lower than 4/5 of scale division. Unit weight is too small for ensuring accurate quantity calculations.

10) **Low Battery Indicator:** When "🔋" appears, the battery power requires recharging.

11) **CHANGE** Charge Lamp

Red--- battery is charging

Green---battery is fully charged

ACAI Symbol "▼" points at **"ACAI"** when Automatic counting accuracy improvement is functioning.

STABLE Stable indication, Symbol "◣◢ " appears at the top of "STABLE" when scale is in stable condition.

NET Gross weight minus Tare. Symbol "▼" points at "NET" when manual Tare or preset are actions are done.

4-2 Keypad

- Enters specific values for tare, unit weight and other data entries.
- Key (9 xてD) can be also as a space key when edit label.

- Decimal point

- Initiates function setting
- Sets the weight to zero.

- Clears the indicated input values.

- Displays gross and net weight by turns

- Inputs unit weight and run its counting function

- Enters the sampling mode and change its scale choice(scale 1 or 2)
- Switches between main scale and remote platform

- Adds the indicated weight or piece count value into Accumulation memory.
- Enters label editing mode
- Steps to next parameter

(M-)	· Deletes accumulation records
	· Display year, date, time
	· Go back to previous parameter
(MR)	· Recalls and displays the accumulated data
(Hi)	· Selects/ sets the Hi Value of weight or piece
	· change the next content of parameter
	· units switch for the pre-tare function
(Lo)	· Selects the Lo value of weight or piece
	· Changes to previous content of parameter
(TARE)	· Tare
(ESC)	· Give up any setting and return to normal weighing
(ITEM)	· Call up unit weight ID
	· Enable / switch on relay output function under HI/LO setting.
	· Print
	· Disable/ switch off relay output function under HI/LO setting.

5. Analog Section

Input sensitivity	1~4mV/V
Zero adj. Range	20% FS
A/D conversion rate	10 times per second.
Load cell excitation	5V DC
Number of load cells.	up to 4x350 ohm loadcells
Resolution.	1/30,000

6. Setting mode

1. Under the weighing mode, long press key ⊘ for 3 seconds to enter basic parameter setting mode.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
P-00	PoᵒEr	oFF

2. Press (M+) or (M-) to switch between parameters from P-00 to P-07

3. Press key (Hi) or (Lo) to step through all the available setting options.

4. Press key (✎/FUNC) to save the setting and return to weighing mode.

Parameter description

1. P-00 Power (default: off) Set the period of inactivity before the scale automatically turns off. Options are Off =non power-off, 10, 20,30,40,50, 60, 70, 80 and 90 (minutes).

2. P-01 Backlight (default: auto)

ΩFF=always off   Ωη=always on   ΩUEΩ=turn on when the weight is over 20e

3. P-02 Serial number display (default: off)

ΩFF=never display   Ωη=will display when price is zero

4. P-03 Beep sound (default: in)

ιη= when check is OK   οUE = when check is Hi/Lo   (ιη, οUE = using scale's buzzer)
E-ιη=when check is OK   E-οUE=when check is Hi/Lo   (E-ιη, E-οUE=using light tower's buzzer)

5. P-04 ACAI (default: off)

Options: off/5/10/15/20/25/30/35/40/45

6. P-05 Printer model (default: normal)

Options: normal / EZ/ BP/SH/ZEBRA   (normal as compatible printer)

7. P-06 Rs-232 Baud Rate (default: 9600)
Options: 19200 / 9600 / 4800 / 2400

8. P-07 Data (default: n81)

Options: n81 / o81 / e81 / n71 / o71 / e71

7. Dual Channel
7-1 Diagram of sub channel connector

1	E+
2	E-
3	S+
4	S-
5	GND

7-2 Installation Process

1. Turn on the main scale
2. Connect the remote platform to JCAII main scale

7-3 Setup

1) Under the weighing mode, long press key (⊘/func) for 3 seconds to enter basic parameter setting mode.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
P-00	PoᵒEr	oFF

2) Long press key (GROSS/NET) to enter advance parameter setting mode.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
A-00	rEro	d2

3) Press key (M+ Up) or (M− Down) to select parameter A-08.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
A-08	dUAL	boEH

4) Press key (Hi) or (Lo) to step through all the available setting items.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
A-08	dUAL	SUb

boEH = Using main scale together with the remote platform
SUb = Use the remote platform only

mAin = Use the main scale only

5) Press key (⊘/func) to save the setting and return to weighing mode.

7-4 Maximum Capacity & Division Setting & Unit

1) Press and hold (GROSS/NET) while turning on the scale. Do not release (GROSS/NET) till r-mA in is displayed in the Total Count window.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
6.0000	2	r-mA in

2) Use numeric keys together with (⊘/func) to input the new capacity, press key (CE) to clears the indicated input values.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
3.0000	2	r-mA in

3) Press key (Lo) advance to division setting. Use numeric keys to input the new division.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
3.0000	1	r-mA in

4) Press key (SMPL) to advance to Maximum Capacity & Division Setting of the remote platform.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
15.00	1	r-SUb

5) Repeat step 2-3 to complete the settings.

6) Press key (GROSS/NET) to save the settings and return to weighing mode.

7）Press key (UWS/⊘囗) to change its unit: kg, lb, g.

7-5 Calibration

SUb= remote platform

mAin = main scale

Note:

- Please calibrate the main scale first.

- The calibration steps of main scale and remote platform are the same. Press key (SMPL) to switch the calibration for the main scale or remote platform before the zero point calibration.

- You can only do the calibration for the remote platform after you have set the max. capacity and division of the remote platform.

Here take JCAII-6K as an example.

1. Press key (M+) and hold while turning on the scale. Do not release (M+) till $\mathsf{CAL\text{-}0}$ is displayed in the Unit Weight window.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0.0000	CAL-0	mAin

2. With no load on the weighing pan, press key (ZERO/→0←) to start the zero point calibration and wait till $\mathsf{CAL\text{-}1}$ is displayed in the Unit Weight window. Input the first calibration weight value by the numeric key (6K model, 1/3 of full load is 2kg). And then put the corresponding weights on.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
2.000	CAL-1	mAin

3... Press key (ZERO/→0←) and wait till $\mathsf{CAL\text{-}2}$ is displayed in the Unit Weight window. And then put the corresponding weights on.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
4000	CAL-2	mAin

4. Press key (ZERO/→0←) and wait till $\mathsf{CAL\text{-}3}$ is displayed in the Unit Weight window. And then put the corresponding weights on.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
6.000	CAL-3	iiAin

5. Press key $\overset{ZERO}{\to 0\leftarrow}$ and wait till PASS is displayed in the Total Count window.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
6.000	CAL-3	PASS

6. Press key $\overset{ZERO}{\to 0\leftarrow}$ to save the settings and return to weighing mode

7-6 Set AD gain of remote platform

1. Under normal weighing mode, press (FUNC) for 3 seconds to enter the basic parameter setting.

2. Press (GROSS/NET) for 3 seconds to enter the advanced parameter setting.

3. Press key (M+) or (M–) to select parameter A-07

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
A-07	Ad	32

4. Press (Hi) or (Lo) to select the AD gain. (Options: 1/2/4/8/16/32/64)

5. Press (FUNC) to save and return to normal weighing mode.

7-7 Switch between Main scale and Remote platform

1. Press (SMPL) to switch between main scale mode and sub channel mode (remote platform)

2. The 55555 flashed in the Weight Window.

3. When 55555 flashing disappear, means that you are in the sub channel mode (remote platform). Now the remote platform could be used

4. To change back to the main scale mode just press (SMPL) and iiiiiiii will flash in the Weight Window.

5. When iiiiiiii flashing disappear, means that the scale have returned back to main scale mode.

8. Operation
8-1 Zero-point

Press $\overset{ZERO}{\to 0\leftarrow}$ if you do not see "→O←" but symbol "◣◢" appears

8-2 Tare & Preset Tare
8-2-1 Tare
1. Under the weighing mode, place a container weighing (eg. 0.100kg) on the pan.

WEIGHT   UNIT WEIGHT   TOTAL COUNT (PCS)

```
0.100    0    0
```

2. Press key (TARE) to complete tare action. The ⟫T⟫ symbol appears with symbol ▼

WEIGHT   UNIT WEIGHT   TOTAL COUNT (PCS)

```
0000    0    0
```

pointing at "NET".

3. Put the load on the container. The display shown is the Net weight. Press key (GROSS/NET) to see the gross weight.

4. To clear tare, with an empty pan, press key (TARE)

8-2-2 Preset Tare

1. Input the tare value using the numeric key together with key (FUNC), and press (Hi) to switch units(g / kg). (scale will beep if the tare value is larger than full capacity.)

2. Press key (TARE). The ⟫T⟫ symbol appears with a symbol ▼ pointing at "NET" and another ▼ pointing at "PRESET TARE"

3. Put the load on the container. The display shown is the Net weight. Press key (GROSS/NET) to see the gross weight.

4. To clear tare, with an empty pan, press key (TARE)

8-2-3 Auto-tare
Set the high limit of the tare value

1. Press (Hi) under normal weighing mode. tArE appears in the Total Count window.

WEIGHT   UNIT WEIGHT   TOTAL COUNT (PCS)

```
0000    0    tArE
```
(If not, press (TARE))

WEIGHT   UNIT WEIGHT   TOTAL COUNT (PCS)

```
0.100    0    tArE
```

2. Use numeric key to input the high limit value. Eg. 0.1kg.

3. Press (Hi) to save and return.

Set the low limit of the tare value

1. Press $\textcircled{\text{Lo}}$ under normal weighing mode. LЯⁿE appears in the Total Count window.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000	0	LЯⁿE

. (If not, press $\textcircled{\text{TARE}}$)

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0 100	0	LЯⁿE

2. Use numeric key to input the low limit value. Eg. 0.1kg.

3. Press $\textcircled{\text{Lo}}$ to save and return.

Enable/disable the Auto-tare function

1. Under normal weighing mode, press $\textcircled{\text{Hi}}$ or $\textcircled{\text{Lo}}$. LЯⁿE appears in the Total Count window.

(If not press $\textcircled{\text{TARE}}$)

2. If you want to enable auto-tare function, press $\textcircled{\text{ITEM}}$

If you want to disable auto-tare function, press $\textcircled{\text{DIS}}$

Note: the unit of normal weighing and tare setting are same.

8-3 Counting method
8-3-1 Key in a known unit value

1. Use numeric key to input the unit weight value(eg.1.2g), then press key $\textcircled{\text{UWS}}$

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000	12000	0

2. Put the article on the pan, and the scale starts counting

Note: Symbol "▼" points at "UW" when entered unit weight is lower than 4/5 of scale division. Unit weight is too small for ensuring accurate quantity calculations.

8-3-2 Sample counting

Note: Do tare or zero-point before doing the following steps
1. Put samples onto the weighing pan and input the quantity with the numeric key.

(eg. 0.300kg, 20pcs)

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0.300	20	0

2. Press key $\textcircled{\text{SMPL}}$. The unit weight is calculated

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0.300	15098	20

3. Remove the samples and put on the articles, the scale begins to count

Note: Symbol ▼ appears pointing at " ⋰ " in the Unit Weight window when sample quantity is less than 10 pieces.

8-3-3 ACAI

Automatic Counting Accuracy Improvement (ACAI) results in a more accurate count by increasing the reference weight without the need to count additional parts. A higher reference weight is important when there is a risk of inconsistent piece weights or if the reference weight is close to the minimum. ACAI uses an initial averaging unit weight to count additional weight that is placed on the scale. After a few seconds, the scale gives a beep as a new higher reference weight is used to recalculate the averaging unit weight. The process can be repeated as long as the additional weight is less than the less than previous reference weight. Once the limit is exceeded ACAI is turned off.

Note:
- If you set the average parameter (P4) to OFF, it means that the scale will do the ACAI in all situations.
- If you set the average parameter to 15, the scale will not work if there is an object shortage or more than ±15% of the unit weight.
- Whether it works or not, depends on the object's tolerant of weight.

8-3-4 Simple Recipe Function

1. Hold the ( ) for 3 seconds under the normal weighing mode, then press ( ) to set the advance parameter. Press key (M+) or (M—) to select parameter A-10, and press (Hi) or (Lo) to activate or disable this function.

2. Press ( ) to save the setting and return to normal weighing mode.

3. Activate the simple recipe function, and press (M+) after put the item on the weighing pan, then the scale will tare automatically when keeping the item. Repeat the same operation until get all material needed for a recipe.

4. Press MR to check all accumulation items.

5. Clear the weighing pan and press TARE to continue a second recipe weighing.

8-4 Accumulation
8-4-1 Choose Accumulation Mode
1. Press (M+) with no load on the pan.

2. Press (Hi) or (Lo) to choose the accumulation mode

ⁿRnUR=Manual
StRbL= Auto-accumulate when ◣◢ symbol appears
PιECE= Auto-accumulate when quantity is between HI – LO limits
YEιGH= Auto-accumulate when weight is between HI – LO limits
3. Press (M+) to save and return.

8-4-2 Set the Max Account of accumulation
The max accumulation number is 99. You can change the max accumulation number as following:
For example, if you want to change the accumulation number to 9

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000	9	0

1. Press (9) and the Unit Weight display is blinking.
2. Press (M+) to save and return. And now you can accumulate up to 9 times only.

Note: You can change the max accumulation back to 99 times by repeating the above steps.
It will beep for 3 seconds when accumulate to the max account (eg. Max accumulation=9) and the

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
2000	RRC09	0

ⁿRC-09 is blinking

Under this condition, you have the following options:

- Press (⊘), it will print every set and total, *ⁿRC-09* is still blinking. (It is only for normal printer SH-24. Label printer could not do it.)

- Press (ESC) to return to normal weighing mode, and still keep accumulation.(But if you try to accumulate another set, it will appear *ⁿRC-09* to warm)

- Press (M–) twice to delete all accumulation,

8-4-3 Manual Accumulation
1. Put the article on the pan. Press key (M+). The symbol "*RCC 1*" is blinking in the Unit

| WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0.300ᵏ	ACC r	300

Weighting window. This is the first accumulation.

2. The symbol ▼ will appear pointing at the " ⇨Σ⇦ " after the blinking.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0.300ᵏ	1.0000ᵍ	300

3. Repeat step 1.

4. Press (ESC) to return to normal weighing mode.

8-4-4 Accumulation display

1. Press (MR) to see the last accumulation value.

2. Press (MR) once more to see the total accumulations value.

3. After the above two steps, press (MR) again, it will display every accumulation value one by one.

4. Skip 2-3 steps and press any numeric key to see a certain accumulation. For example, if you want to see the 12ᵗʰ accumulation, press key (1)(2).

5. Press (ESC) to return to normal weighing mode.

8-4-5 Print while display of accumulation

Note: Only for SH-24
Print a certain accumulation

Enter a certain accumulation display, press (⊘)

Print total accumulation

Enter total accumulation display, press (⊘)
Weight on the scale will print out every set and total
No weight on the scale will just print out the total

8-4-6 Delete accumulation

Delete a certain accumulation
1. Enter a certain accumulation display, press (M−) to delete.

2. Press (ESC) to return to normal weighing mode.

Delete total accumulation

1. Enter the total accumulation display, press (M—) to delete.

2. Press (M—) again to delete and return to normal weighing mode. If you don't want to delete,

press (ESC) to return to normal weighing mode.

8-5 Print

Put the load on the pan and press key ⊙ to print. (Note: the weight should be more than 20e)

8-5-1 Set a Print form
EZ/BP/GP set 0~99 forms (The printer should be initialized first); SH-24 set 0~15 forms

1. Press key ⊙ with no load on the pan.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000ᴺ	0ᴵ	Prt-00

2. Key in the Form Number with numeric key. For example, if you want to choose the 9th form,

press (9).

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000ᴺ	0ᴵ	Prt-09

3. Press key ⊙ to complete and return to weighing mode.

JCAII 15

Note: (1)If you wish the SH-24 should be able to print date & time, the scale needs an optional module RS-232+RTC.

(2)If you have a printer that you think is compatible with the SH-24, then just connects the scale and the printer and remember to choose print model *norɪпAL* (even it is not the SH-24). Please choose own of the print formats from Prt-00 to Prt-15 and if the print appears correct, means that the printer is compatible with the SH-24.

8-5-2 Set Print mode

1. Press key ⊘ with no load on the pan.

2. Press key ⊘. The display shown is

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0.000ₙ	ɪпAпUA'	Prt ---

3. Press key (Hi) or (Lo) to choose the print mode

ɪпAпUA= Manual

ʃɪƐʜoL= Print after ▲◢ appears

ПɪƐƐƐ= Print when quantity is ok (with check function)

уƐɪ Uʜ= Print when weight is ok (with check function)

ʃonƐɪ= Print continuously

no=No action

4. Press key ⊘ to complete and return to weighing mode.

8-5-3 Select the Printer Model

1. Under normal weighing mode keep pressing ⊘ for about three seconds to enter parameter setting.

2. Press ⊕ or ⊖ to switch between the parameters and select P-05

3. Press (Hi) or (Lo) to choose printer model

bP= BP printer output (Automatic-sticking), paper size: 5cm*3cm

ʒƐbrA= ZEBRA printer output (Automatic-sticking), paper size: 5cm*3cm

ʃʜ= SH-24 printer output (dot-matrix)

Ɛʔ= EZ printer output (Automatic-sticking), paper size: 5cm*3cm

norɪпAL= Normal compatible printer

ƐƐ = LED display

ūP = Adhesive sticker label

8-6 Serial number
8-6-1 Set Serial Number Mode

Note: The weight should be less than 20e and there is no accumulation data.

1. Under normal weighing mode, press (MR). It will show as

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
ŨŨŨŨ	¼no·¹	¼ĿñbĿ

(If not, press (🔅)). Scale would appear the accumulation data, if there is acc record. Delete

the acc data firstly, then set the serial number function.

2. Press (Hi) or (Lo) to choose the serial number mode

ñ̄AnŨA=No action

¼ĿñbĿ= The serial no. plus 1 when ▲▲ symbol appear.

P₁ĿĿĿ=The serial no. plus 1 when quantity is between HI-LO limits

¼Ė₁ĿH=The serial no. plus 1 when weight is between HI-LO limits.

3. Press (MR) to save and return.

8-6-2 Set Max Serial Number

The max serial number is 9999, but you can change the max serial number as shown below.

For example: if you want to change the max serial number to 9, do as the following.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
ŨŨŨŨ⁻	9	Ũ

1. Press (9) and the Unit Weight display is blinking.
2. Press (MR) to save and return.

Note: When the serial number reaches the max, the Unit Weight display will flash ñ̄Ā¼no⁻ and

beep for 3 seconds and then return to normal weighing mode.

And because it has reached the max serial number, it will reset to 1 when the serial number do

increase 1.

8-6-3 Change the Current Serial Number

For example: if you want to change the serial number to 9, do as the following.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
ŨŨŨŨ⁻	9	Ũ

1. Press (9) and the Unit Weight display is blinking.
2. Press (GROSS/NET) to save and return.

Note: the serial number is starting from 9.

8-7Quantity check
8-7-1 Set the high limit of quantity

1. Press (**Hi**) under normal weighing mode. The last high limit value of quantity is blinking in the

   Total Count window while the arrow is pointing at HI. (If the value in Total Count window is not

   blinking , press (**SMPL**))
WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000ᴺ	0	111

Eg. 111pieces.

2. Use numeric key to input the high limit of quantity you want.
3. Press (**Hi**) to save and return.

8-7-2 Set the low limit of quantity

1. Press (**Lo**) under normal weighing mode. The last low limit value of quantity is blinking in the

   Total Count window while the arrow is pointing at LO. (If the value in Total Count window is not

   blinking, press (**SMPL**))

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000ᴺ	0	111

Eg. 111pieces.

2. Use numeric key to input the low limit of quantity you want.

3. Press (**Lo**) to save and return.

8-7-3 Enable / Disable the quantity check function

1. Under normal weighing mode, press (**Hi**) or (**Lo**). The display in the Total Count window is

   blinking. (If the value in Total Count window is not blinking press (**SMPL**))

2. If you want to enable the function, press (ITEM/EN)

   If you want to disable the function, press (DIS)

Note: When the HI & LO checking function is enabled, there will be an arrow pointing between

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000ᴺ	0	0

PERSET TARE and NET.

8-8 Weight check
8-8-1Set the high limit of weight

1. Press (**Hi**) under normal weighing mode. The display of the weight is blinking in the Weight

window while the arrow is pointing at HI in the Total Count window. (If the value in Weight window is not blinking, press (UWS ⊘☐))

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
2000	*0*	*0* HI OK LO

Eg. 2kg.

2. Use numeric key to input the high limit of weight you want.

3. Press (Hi) to save and return.

8-8-2 Set the low limit of weight

1. Press (Lo) under normal weighing mode. The display of the weight is blinking in the Weight window while the arrow is pointing at LO in the Total Count window. (If the value in Weight window is not blinking, press (UWS ⊘☐))

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
2000	*0*	*0* HI OK LO

E.g. 2kg.

2. Use numeric key to input the low limit of weight you want.

3. Press (Lo) to save and return.

8-8-3 Enable / Disable the weight check function

1. Under normal weighing mode, press (Hi) or (Lo). The display in the Weight window is blinking. (If the value in Weight window is not blinking, press (UWS ⊘☐))

2. If you want to enable the function, press (ITEM /EN)

   If you want to disable the function, press (⊘ /DIS)

Note: When the HI & LO checking function is enabled, there will be an arrow pointing between

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000	*0*	*0*

PERSET TARE and NET.

8-9 Unit weight ID

Note: possible save up to 50 ID

8-9-1 Saving ID method 1

For example, save 1.23g to ID 12

1. Press (1) (⊘) (2.) (3.) under normal weighing mode and the Unit Weight is blinking.

2. Press (ITEM/EN) and key in the accumulation number (1) (2.ABC). The Total Count window will

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000N	123' / 123	5-1212

blinking.

3. Press (ITEM/EN) to save

8-9-2 Saving ID method 2

.For example, there is a unit weight 1.23g already existing and save it to ID 12

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000N	- 123'	-- 0

1. Press (ITEM/EN) and key in the accumulation number (1) (2.ABC) and the Total Count window

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000N	123'	5-1212

will blinking.

3. Press (ITEM/EN) to save.

8-9-3 Call up ID

Note: If the Unit Weight display is not showing 0, please press first (CE)

1. under normal weighing mode, press (ITEM/EN)

2. Use numeric key to input a certain ID. (e.g. (1) (3.DEF) to call up ID 13)

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
0000N	12300'	Cd-13

3. Press (ITEM/EN) to confirm and the scale is ready for counting.

8-10 Label
Set your own label

Note: The label can save up to 32 characters

1. Keep pressing (M+) until you see the display as shown.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
-		

Arrow "▶" pointing at **HI** means that the first 16 characters can be edited.

2. Keep pressing and releasing (2 abc). The display will show $?$, A, b, C in order. Choose A for example.

3. Press (Lo) or do nothing for a while to edit the next character. Press (Hi) to move leftwards and (Lo) to move rightwards. Press (CE) to clear.

4. Repeat 2-3 steps to complete the first 16 characters.

5. Press (Lo) to complete the next 16 characters. The shown is

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
-		

Arrow "▶" pointing at **LO** means that the last 16 characters can be edited.

6. Do as steps 2-4

7. Press (M+) to save and return to normal weighing mode.

8-11 Time Setting

1. Press and hold (M-) under normal weighing mode.

WEIGHT	UNIT WEIGHT	TOTAL COUNT (PCS)
2001	10-23	10:13:16

2. Press (⊘ func) to enter adjusting mode.

3. Press (Hi) to move leftwards and (Lo) to move rightwards. Use numeric key to input the adjustment.

4. Press (M-) to save and return.

8-12 Error message

Error Message	Reasons	Solutions
E noEE	The CPU unable to read the EEPROM	Return to the Manufacturer
E CRLF	Unable to read the 3 points calibration range	Do the 3 points calibration
?Hi	Zero Point is too high	Make sure the pan is empty when turn on the scale or perform the 3 points calibration.

$\mathsf{r}Lo$	Zero Points is too low	Make sure the pan is on the scale or perform the 3 points calibration.
$E\ \mathsf{Un}\mathsf{St}$	Unstable Zero Point	(1)Make sure there is no winds or vibration. (2)Change the stability /vibration parameter accordingly.
$\mathsf{CLR}\text{-}b$	Battery for RTC is too weak	Replace a new battery or press (ESC) to abort.
- - - - -	Overload (The weights on the pan is more than +9e of the max. capacity)	Take away the overloaded objects.
ouEr	The value in the Total Weight window or Total Count Window exceeds the display range	(1)Press (M–) key twice to clear the all the accumulation or press (ESC) key to return to normal weighing mode . (2)Change another bigger unit weight
$\mathsf{ou}\text{-}15$	The last accumulation is more than the preset accumulation allowed .	Press (M–) key twice to clear the all the accumulation or press (ESC) key to return to normal weighing mode .

8-13 Problem & Solution

Printer cannot print out
- Make sure the parameter P-05 is set correctly.
- Make sure the parameter P-06 and P-07 match the printer.
- If EZ or BP is being used, they should have download the printer format before.

HI & LO checking do not work
- Make sure the function is enabled.
- The value of LO is greater than HI.

No sound in HI & LO checking function
Make sure the parameter P-03 is set correctly.

Reset the time every time when the scale is turned on
Connect an optional RTC

How to check whether the printer is compatible to the scale

- Under the parameter P-05, select "normal" printer.
- Check the baud rate (P-06) and the data (P-07) is compatible to printer. If not, please change the setting accordingly.
- Under the normal weighing mode, press ⊘ to print. If the printer is able to print, it means that this printer can replace the SH-24 printer.

9. Option
Scale to Printer

Scale to BP545D(TDP) printer	Scale to SH-24（TP）printer
SCALE BP545D	SCALE SH-24
